

IRIDEX CORPORATION

IRIDEX Corporation is a worldwide leader in developing, manufacturing, marketing and selling innovative and cost-effective medical laser systems. The company has the largest global installed base of solid-state lasers and focuses on developing laser products that are clinically effective, reliable, portable, versatile, and affordable.

IRIDEX was founded in 1989 as IRIS Medical® Instruments, Inc., and went public as IRIDEX Corporation (NASDAQ/NMS: IRIX) in 1996. IRIDEX products are sold in the U.S. through a direct sales force and internationally through a network of independent distributors in over 100 countries worldwide.

O P H T H A L M O L O G Y

For well over a decade IRIDEX has supported research, collaborated with physicians, and developed products to perform laser therapy for the treatment of eye diseases. IRIS Medical laser products treat a variety of eye diseases, including the three leading causes of irreversible blindness: age-related macular degeneration, diabetic retinopathy, and glaucoma. The family of products include green and infrared lasers with a wide range of compatible delivery devices including single use disposable probes.
