DioVet™ 810 nm Laser System

The Portable and Versatile Diode Laser Photocoagulator

The DioVet laser system is used worldwide by veterinary ophthalmologists to treat glaucoma, retinal disorders and pigmented tumors.

Offering an 810 nm wavelength, the DioVet system enables transscleral glaucoma and retinal procedures with greater accuracy and less postoperative pain and inflammation than cryotherapy.

In addition, the system’s low weight and compact size allow easy transport to multiple clinics or remote locations.
